

# ROOF LANTERN

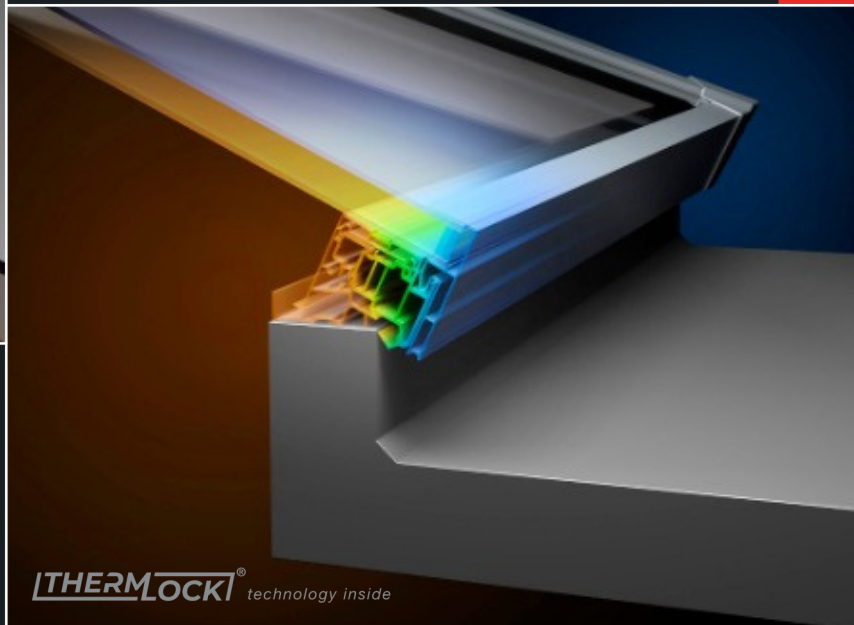

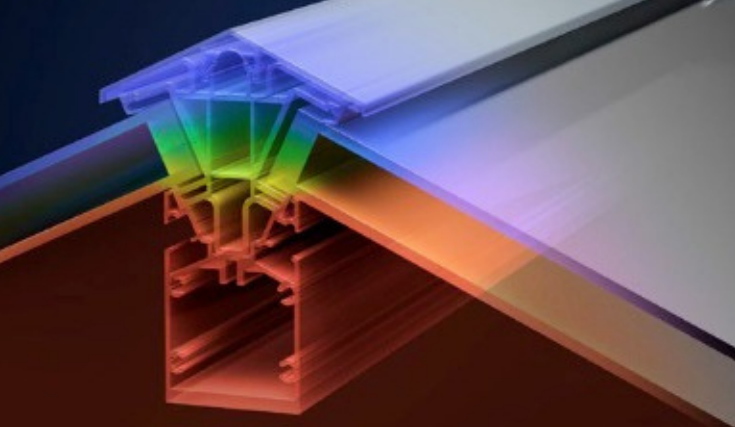

Choosing the right roof lantern for your project is an important decision. They should let in the maximum amount of light, yet be as thermally efficient as possible!

Our Roof Lantern S1 has been designed from the ground up to meet your every need for a warmer, slimmer and much more secure product.

Thermlock® multi-chamber thermal technology helps keep heating bills low, while deep internal bars create an ultra strong structure for spans up to 3.2 x 6m without tie bars. Ultra low line aesthetics give a stylish architectural appearance, enhanced with hardwearing powder coated aluminium inside and out.

15 DAYS LEAD TIME

28mm glazing

**1.0 U-value**

(W/m<sup>2</sup>K) Double Glazed

Thermal transmittance, also known as a U-value, measures the rate of transfer of heat. The better insulated a product is, the lower the U-value will be.

**THERMLOCKI**® technology inside

Whatever the weather Thermlock® technology helps keep you comfortable and heating bills lower.

The Roof Lantern combines super clean lines with exceptional thermal performance to keep your property well insulated against the worst of the UK weather.

This coupled with high performance 28mm glazing means our lanterns offer leading thermal performance compared to other systems. A unique co-extruded perimeter seal also ensures draughts and rain are kept safely outside.

#### GLASS OPTIONS

28 Glazing units available in both Clear and Blue Self-Cleaning options.

 Reduced condensation	 1.0W/m <sup>2</sup> k U-value	 Low maintenance self-cleaning
---	--	--
